

Product Range

Kreussler is a modern, medium-sized company of the chemical industry that has been in possession of the founder's family for four generations and aims at retaining its independence.

Kreussler was founded in 1912 as a company for the production of colourants and auxiliary agents for textiles. In 1948, the company started the development and marketing of medicaments. This branch of production, "Kreussler Pharma", is the second pillar of the company. Since 1985, Kreussler has

led the European market in dry-cleaning. The development of wet-cleaning (Miele System Kreussler) and the winning in 1993 of the State of Hessen Innovation Award are examples of the future-oriented activities of Kreussler. Commercial laundry chemicals, a sector added in 1990, has been expanding strongly and today has the largest share in the textile chemicals division.

The worldwide activities of Kreussler are oriented towards the production of highly effective goods in combination with competent application technology. The in-house research, development, and optimization of products and procedures are aimed at using resources and energy as economically as possible, at avoiding hazardous substances, and at minimizing the amount of waste. The quality management certified according to ISO 9001 and ISO 14001 ensures continuous improvement of the quality of Kreussler products and services.

The medium-term target of Kreussler is winning the technological leadership in laundry chemicals and laundry technology, the further expansion of wetcleaning, and the continual optimization of applications for textile cleaning in solvents.

Dr. Detlev A. Travers
Managing Partner

Wetcleaning and special detergents

LANADOL – Wetcleaning

LANADOL AKTIV

Special cleaning and fibre protection agent with colour-stabilizing effect for wetcleaning using the **LANADOL process**.

LANADOL APRET

Fibre-protecting agent with retexturing effect and antistatic properties for application with finishing baths in wetcleaning.

LANADOL AVANT

Colour and fibre-protecting special fat dissolver for extremely dirty textiles. For direct application prior to wetcleaning processes using the **LANADOL procedure**.

LANADOL LICKER

Leather oiling agent for treatment of leather and suedes in wetcleaning and for reoiling cleaned leather in a spraying process.

LANADOL ABAC

Disinfectant for outerwear, nursing home ware, protective clothing, and breathing masks. Disinfectant for the rinsing zone in continuous batch washers. Listed: DIN EN 1276 (bactericide), DIN EN 1040 (bactericide), DIN EN 1275 (fungicide), DIN EN 14476 (virucide)

Special detergents

DERVAL AN

Wool and light-duty detergent for sensitive textiles and carpets.

DERVAL RENT

Concentrated liquid colour-wash detergent, without optical brightener or bleach, for cotton and mixed-fibre textiles. Listed: RKI (Type A – submitted for registration), VAH/DGHM

TREBON 2

Enzyme-containing cleaning power enhancer for extremely dirty laundry.

COLOFIX

Fixing and levelling agent for direct dyes on textiles. As well as colour stabilisation and protection of redeposition in colour wash processes.

FOMEX SI

Silicone emulsion for foam suppression with aqueous surfactant solutions.

Liquid laundry system ESDOGEN

ESDOGEN DETERGENT

Universal laundry detergent for application in the ESDOGEN system. Liquid concentrated detergent with optical brightener and without bleach for textiles made of cotton, synthetics, and textile blends. Listed: RKI (Type A – submitted for registration), VAH/DGHM

ESDOGEN BOOSTER

Enzyme-containing wash power enhancer for textiles heavily soiled with fat and/or albumin for application in the ESDOGEN system.

ESDOGEN ALKAPLEX

Alkaline complexing agent that enhances the washing effect for extremely soiled textiles made of cotton and synthetics for application in the ESDOGEN system.

ESDOGEN DESINFECT

Activated concentrate for oxygen bleaching and laundry disinfection of textiles made of cotton and synthetics. For use in the ESDOGEN system. Listed: RKI (Type A – submitted for registration), VAH/DGHM

RKI – Robert-Koch Institute, Berlin,
Type A = bactericide + fungicide,
Type B = virucide

VAH/DGHM – Association for Applied Hygiene/German Society for Hygiene and Microbiology

DIN EN – European Standards

DIN EN ISO 9001:2000
DIN EN ISO 14001

Professional detergents for superior demands

Wash-power booster

DERVAL BRIGHT

Liquid highly concentrated wash-power booster with optical brightener. Particularly efficient for natural oils and fat even at temperatures of 60 °C. For white textiles made of cotton, polyester and blended fabrics.

DERVAL PRE

Highly concentrated wash-power booster for heavily soiled laundry. Fat remover for all kinds of textiles. Optimal efficiency at 70 – 80 °C.

DERVAL ENERGY

Highly concentrated wash-power booster for removing oil and grease stains from textiles. Effective at washing temperatures of 40 – 60 °C.

Single-shot detergents

DERVAL POWER

Liquid highly concentrated one-shot detergent with optical brightener. Excellent cleaning power for cotton and blended fabrics. Listed: RKI (Type A,B – submitted for registration)

DERVAL ALKA

Basic washing agent with alkali builder for washing heavily soiled textiles.

DERVAL SOLO

Liquid one-shot detergent concentrate for white and coloured cottons and mixed fibres. Listed: RKI (Type A,B), DIN EN 1276 (bactericide), DIN EN 1275 (fungicide), DIN EN 14476 (virucide)

TREBON SI

One-shot detergent for washing of heavily soiled textiles made of cotton and blends. Listed: RKI (Type A,B), DIN EN 14476 (virucide)

TREBON BASIS

Phosphate-free basic detergent for washing textiles made of cotton and blends. Listed: RKI (Typ A)

Main-wash detergents

TREBON PLUS

Superconcentrated heavy-duty detergent for white textiles for application in hard and soft water at 30-60-90 °C. Phosphate-free and NTA free. Listed: RKI (Type A,B), DIN EN 1276 (bactericide), DIN EN 1275 (fungicide), DIN EN 14476 (virucide)

TREBON EXTRA

Highly concentrated heavy-duty detergent for white and coloured textiles for application in hard and soft water at 30, 60 and 90 °C. Free of phosphates.

Detergents for coloured fabrics

TREBON COLOR

Highly concentrated detergent for coloured textiles made of cotton and blended fabrics.

DERVAL COLOR

Liquid compact colour detergent with colour protection for textiles made of cotton and polyester- cotton blends.

Laundry ancillaries

Agents for bleaching and disinfection

OTTALIN PERACET

Activated concentrate for oxygen bleach and for laundry disinfection. Listed: RKI (Type A,B), DIN EN 1276 (bactericide), DIN EN 1275 (fungicide), DIN EN 14476 (virucide)

OTTALIN PA CONC

Super concentrate for the bleaching and disinfection of textiles. Listed: RKI (Type A,B – submitted for registration)

OTTALIN OXY

Highly active bleaching soda based on perhydrated compounds. For oxygen bleaching in laundry processes, with improved washing results.

OTTALIN CL

Phosphate-free chlorine bleach powder for intensive bleaching.

Miscellaneous

OTTALIN ENZYM

Enzyme-complex concentrate for albumen breakdown and fat removal during pre-wash.

OTTALIN PLEX

Concentrated complexing agent for removing lime, rust, and gypsum deposits from textiles and machines as well as for softening extremely hard water.

OTTALIN ECOSAN

Oxygen reducer for continuous batch washers.

OTTALIN ODX

Laundry odour absorber for removing foreign odours.

Waterproofing/finishing

HYDROB FC

Water and oil proofing agent for waterproofing and stain-protective finishing of textiles. Application in water.

HYDROB OP

Proofing agent for regenerating the water and alcohol resistance of OT textiles.

OTTALIN SOFT

Fabric softener with antistatic properties and a fresh scent.

OTTALIN FINISH

Finishing agent with handle enhancing and antistatic properties for cotton and polycotton blends.

The top assortment in textile care in all solvents

Drycleaning detergents

CLIP GREEN CONC

Drycleaning detergent concentrate with sensational cleaning power. Free of VOC and formulation aids. For use in Perc and hydrocarbon.

CLIP COMFORT

Concentrated drycleaning detergent with highly active odour absorber, neutral scent, excellent antistatic characteristics and comfort retexturing properties in textile cleaning. For use in Perc and hydrocarbon.

CLIP CONC ASEPT

Highly concentrated drycleaning product for hygienic cleaning, retexturing, and antistatic finishing in textile cleaning. For use in Perc and hydrocarbon.

CLIP COMBI

Concentrated drycleaning detergent with excellent antistatic properties and fragrance for hygienic textile cleaning. For use in Perc and hydrocarbon, suited for charged-system machines. VOC-free.

CLIP CSL

Concentrated drycleaning detergent with antistatic properties and handle improving effect. Application in Cyclosiloxane D5 solvent. Approved and recommended by GreenEarth®.

CLIP COO

Drycleaning detergent with antistatic, for textile cleaning in liquid carbon dioxide. Clip COO can also be used for prebrushing.

Pre-spotting/spotting

PRENETT MAX

Highly effective and mild prespotting agent for textile cleaning, for spraying and brushing on. For use with perchloroethylene.

PRENETT PUR

Mild and colour-neutral general-purpose prespotting agent for textile cleaning. For use in hydrocarbon and Perc. VOC-free.

PRENETT A-B-C

Spotting and prespotting agent for drycleaning. For use with Perc, hydrocarbon solvent and cyclosiloxane D5.

DEPRIT PROFESSIONAL

Range of spotting agents for professional users in textile cleaning.

PRENETT CS

Prebrushing agent for prespotting of heavily soiled textiles, to be used with cyclosiloxane D 5 solvent, hydrocarbon or Perc.

Proofing/finishing

VINOY PLUS

Water and oil repellent finishing agent for waterproofing and stain protective finishing of textiles in drycleaning machines. Free from halogenated solvents. For use in Perc and hydrocarbon machines.

AROMATEX

Perfume concentrate for textile cleaning. For use in Perc and hydrocarbon.

Solvent care

ALKANON

Acid binding adsorbent for solvents maintenance in drycleaning machines. For use in Perc and hydrocarbon solvents.

DISTIL

Distillation defoamer for organic solvents. For use in Perc and hydrocarbon solvents.

PERAMON

Acid-binder and stabilizer with deodorizers for solvent care.

ADSORBON

Highly active filter powder for regenerating solvent liquors in drycleaning. For use in Perc, hydrocarbon solvents, and Cyclosiloxane.

Leather ancillaries

OLEODERM

Highly concentrated leather oil with waterproofing effects for cleaning and reoiling of leathers and furs. For use with Perc and hydrocarbon.

OLEODERM CS

The GreenEarth® Suede and Leather Agent. Suede and Leather reoiling agent for bath and spraying processes for use in Cyclosiloxane D 5 solvent.

Use biocides safely. Always read the label and product information before use.
